## Certified Characteristics:

The AQPV brand covers the general contractor's overall service provision offer ie the company which is the sole holder of the photovoltaic design and production contract and, as such, takes full responsibility for it vis-à-vis the project manager.

The purpose of the AQPV brand is to certify that the administrative and legal situation of the company has been checked, is valid and that the company:

- ensures regulatory monitoring and update of a database and is accessible to internal users (regulatory, normative and technical references) related to its activity,
- has the necessary skills for the realization of a photovoltaic installation,
- has a valid insurance cover,
- possesses the human resources that enable it to carry out certified activities under satisfactory conditions,
- has, by its own or through its subcontractors, sufficient material resources to carry out all the tasks covered by the AQPV brand,
- has put in place the necessary provisions to ensure compliance with the technical, personal and collective hygiene and safety rules when carrying out its works,
- has demonstrated its experience in the design, construction and maintenance of photovoltaic systems.
